SUMMARY

Experienced Python developer with 8+ years of expertise in Flask, Django, and MySQL, specializing in scalable full-stack applications and APIs. Skilled in front-end and back-end development, with strong proficiency in database design and management. A collaborative problem-solver passionate about innovation and staying current with emerging technologies.

PROFESSIONAL EXPERIENCE

Software Engineer | Devenue

2024 – Present

- Designed and developed responsive web and Android applications, delivering seamless user experiences optimized for performance, scalability, and cross-platform compatibility.
- Collaborated with clients and cross-functional teams to analyze requirements, implement tailored solutions, and integrate secure real-time features and third-party services.
- Ensured application reliability and user satisfaction through robust deployment, ongoing maintenance, and prompt resolution of issues while adhering to security and performance standards.

Software Engineer | EarnFlex Ltd.

2021 – 2024

- Played Developed EarnFlex Ltd.'s AI-driven platform, enhancing workforce management, shift fulfillment, and compliance monitoring across key industries.
- Achieved measurable impact, including a 30% boost in shift efficiency, 40% faster compliance monitoring, and 25% higher user adoption.
- Supported over 10,000 shift placements through scalable, optimized solutions driving operational excellence.

Founder | Grab a Bite

2017- 2021

- Founded "Grab a Bite," a food tech startup revolutionizing dining by connecting users with home-based vendors through a scalable, community-driven app.
- Designed and implemented an innovative delivery model, leveraging flexible jobs, optimized routes, and real-time tracking to achieve operational efficiency and reduce costs to PKR 8 order.
- Drove business growth and community impact by ensuring timely deliveries, high customer satisfaction, and local employment opportunities, setting a new standard in the food tech sector.

Software Engineer | Global Accent Ltd.

2016 –2017

- Developed and implemented advanced phonetic analysis tools using Praat, MATLAB, and C# to enhance English pronunciation and phoneme evaluation in a language learning software.
- Created precise vowel and diphthong detection scripts, integrating Praat-based analysis with machine learning techniques to deliver accurate phonetic feedback for users.
- Led R&D to enhance pronunciation features, improving user language acquisition and establishing the software as a key tool for mastering English pronunciation.

HONOR & AWARDS

- 1st Position in E-Gamming Tectiqs'13 Speed Programming Competition | Iqra University, Islamabad | Nov 2013
- 1st Position in Nascon'14Code Debugging Competition | FAST-NU | Apr 2014
- 1st Position in AirNexus'16 Speed Programming| Air University | Apr 2016
- 2nd Position in Nascon'15Speed Programming Competition | FAST-NU, Islamabad | May 2015
- 2nd Position in ExclTeCup2015 Speed Programming | CUST, Islamabad| Dec 2015
- 2nd Position in CASE Programming League 2014 | Center for Advanced Studiesin Engineering, Islamabad | Nov 2014

SKILLS

Python, Flask, Django, MySQL, PostgreSQL, AWS (EC2, Lambda, CloudWatch, S3, RDS), Git, Hostinger

EDUCATION

University of Engineering and Technology, Taxila | 2012 - 2016

Bachelor's degree, Computer Science

PROJECTS

EARNFLEX

- Optimized Workforce: Effortless shift management, top-tier vetting, and integrated rota system for efficient staff deployment.
- Streamlined Operations: Simplified supplier interactions and job portal connecting candidates to relevant roles.
- Core Modules: Includes Background Checks, Rota Management, Fulfillments, Invoices, and Payslips
- <https://www.earnflex.com>

AREZ

- Advanced Workforce Management: Provides comprehensive vetting, real-time monitoring, and optimal deployment of security staff.
- Seamless Integration: Combines time management, invoicing, and payroll tailored to the UK security sector's needs.
- Efficiency & Compliance: Streamlines workforce challenges, ensuring operational excellence and industry-specific compliance.
- <https://www.arez.io/>

FORM BUILDER

- Versatile Form Creation: Easily create everything from simple contact sheets to complex surveys with a flexible framework.
- User-Friendly Interface: Intuitive design enables users with no technical background to build forms effortlessly.
- Tailored Experience: Provides adaptive tools for crafting forms that meet specific requirements, blending adaptability and utility.

EPOLICE

- Integrated incident management with Control Room, Reporter, and Responder Apps for seamless coordination and swift resolution.
- Efficient reporting and response through the Reporter App for real-time updates and Responder App for actionable on-ground insights.
- Enhanced public safety through resource orchestration and improved communication, redefining safety protocols.

OTHER PROJECTS

- Engineered a system for streamlined student assessments and automated result recording.
- Devised an automated parking solution that identifies license plates via camera feeds, processes them through optical character recognition, and maintains comprehensive vehicle records.
- Created a GPS-integrated Android security app that relays user data and real-time location to police and personal contacts during emergencies.
- Innovated a home safety system capable of detecting hazards like fire, water leaks, or blasts, promptly notifying homeowners, and relevant departments.
